

iNATURALIST CHALLENGE:

Use iNaturalist to identify at least 5 organisms:

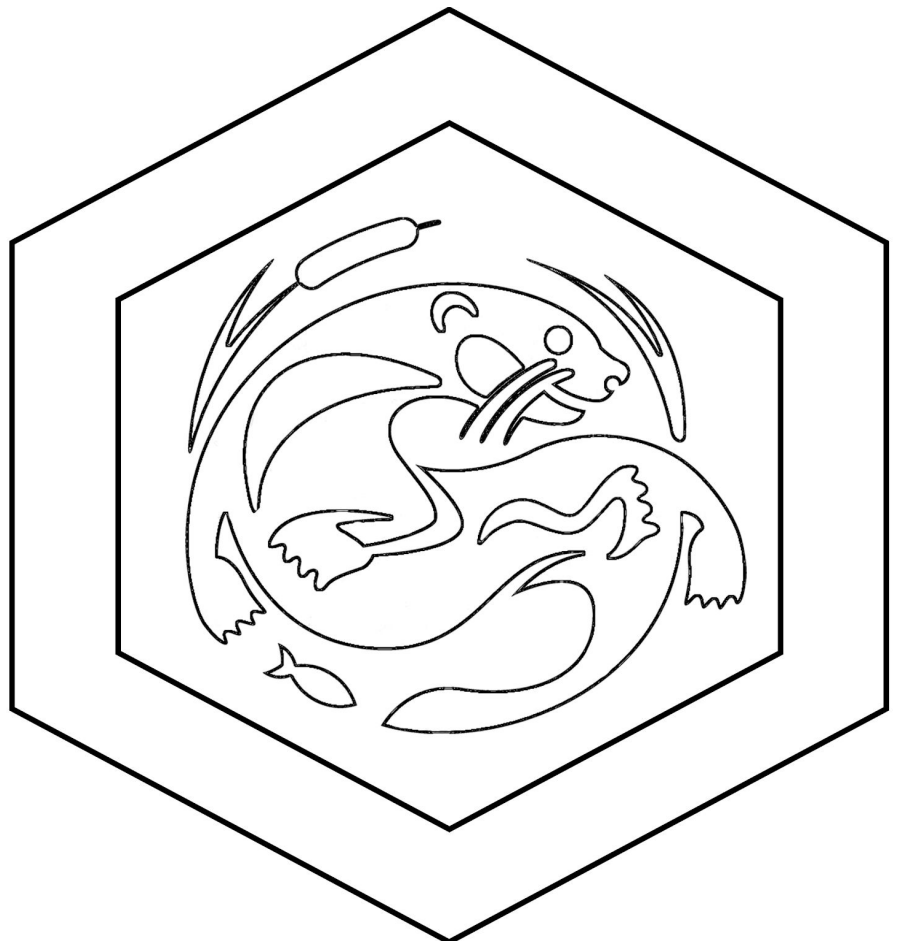

1. **Download the iNaturalist or Seek app** onto your device, or create an account on [iNaturalist.org](https://www.inaturalist.org)
2. **Get outside** and look for interesting wildlife!
3. **Take a picture** of the organism and upload it to iNaturalist.
4. If you don't already know what species it is, **use the app to help you figure out what it is. Option** - If you don't have an internet connection outside, take pictures of all of the organisms you find, and upload them later when you have a connection. you can find more information about each suggested species, genus, or family can be found on iNaturalist.org
5. **Add the location to the entry** and any notes you might want, and submit it. ***Congratulations you are now a citizen scientist!***
6. Color and cut out your own **Wild Center Badge** for completing this challenge.

BONUS - Can you identify?

- 2 different trees
 - 2 different flowers or short leafy plants
 - 1 animal
7. **Get Creative:** Start your own **Nature Journal** with drawings and information about your discoveries. Use the next page to help you get started.

You may want to include:

- Where you found the organism.
- What it was doing or how it grows.
- Unique characteristics
- Other senses used to observe the organism.

iNATURALIST NATURE JOURNAL

Name:

Date:

Location:

Time:

Draw and describe the organisms you identified using iNaturalist.
