

# Create your own Insect Challenge:

Observe some insects around your home or watch a short clip from a Nature Documentary on a streaming platform of your choice.

Now that you have learned about some of the key characteristics of insects and some of their amazing adaptations, **CREATE** your own species of insect. Feel free to make a **model, drawing, and/or write a description of your new species.**

## Remember to include the characteristics:

1. Segmented body with three parts:
  - a. Head
  - b. Torax
  - c. Abdomen
2. 3 pairs of legs (6 total)
3. Antennae on their Head
4. (Optional) Wings

## Up for an Additional CHALLENGE?

**Add some of the information below to you model, drawing, and/or description of your new species:**

- How big or small is it?
- Where does your insect live (what ecosystem or habitat)?
- How does it fit into the food web:
  - What animals or plants it eats
  - What animals are likely to eat it?
