

REPTILES AND AMPHIBIANS:

Life Cycles

Now that we have spent some time learning about the life cycles of reptiles and amphibians directly from some of our Animal Ambassadors, it is time for us to think about where we may have seen each of these amazing life stages!

Key Vocabulary - Eggs, Juvenile, Adult, Metamorphosis

STEP 1 - I SPY...

- Take a few minutes to think about any reptiles and amphibians you have seen, outside or onscreen, throughout your life:

- _____
- Where did you see them?
- When did you see them?
- What life stage do you think you saw? Why?

STEP 2 - TIME TO GET CREATIVE

1. Take a minute to imagine examples of the stages of reptile and amphibian life cycles from eggs to adult.
2. Now draw all the life cycle stages that you can remember in the habitats below.

BONUS - Write down some of the adaptations that help each life stage survive in their particular habitat. What are some differences between reptile and amphibian life cycles?
